## What are the risks of investing?

Risk indicator for the FLP Balanced Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-kickstarter](https://sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

## Notes

- 1 From 12 July 2021, AMP Wealth Management New Zealand Limited (AMPWWM) took over from AMP Capital Investors (New Zealand) Limited (AMP Capital), now known as Macquarie Asset Management (NZ) Limited (Macquarie), as the underlying fund manager for this fund. The fund performance in the table shows fund performance which relates to both AMPWWM (with support from BlackRock Investment Management (Australia) Limited) and AMP Capital, now known as Macquarie.
- 2 For the table, we have used a combined composite index and appropriate market index to calculate market index returns because the fund ceased to invest in relevant assets during the quarter ending 30 September 2021. For the bar graph, index returns have been calculated with reference to a composite index or appropriate market index. The composite index is calculated using the target investment mix weightings of the underlying market and peer group indices for the asset classes that the fund invested into. A composite index may be a less reliable indicator of performance than an appropriate market index. In the table and bar graph, the return for the market index reflects no deduction for fund charges, trading expenses and tax, and the return for the peer group index (forming part of the composite index) reflects deductions for fund charges and trading expenses, but before tax.
- 3 The total fund charges are inclusive of any applicable GST.
- 4 Members may receive fee rebates based on qualifying criteria. These rebates have not been included in the calculation of the fees. Members can refer to their product documentation, or contact AMP at the details below, to identify the fee structure applicable to them.
- 5 The Manager's basic fee is an estimated bundled fee for the combined services of the Supervisor, underlying investment management fees and an Adviser fee being up to 0.45%.
- 6 The other management and administration charges include estimates of underlying fund charges provided by underlying fund managers.
- 7 The actual investment mix and top ten investments have been calculated excluding cash and cash equivalents held for operational purposes.
